SUMMARY

I am an aspiring Full-Stack Developer with six months of hands-on experience in building dynamic and responsive web applications. I specialize in front-end technologies such as React and JavaScript, and have a strong command of back-end development using Django and Python, as well as relational databases including MySQL and SQLite. I am confident in my ability to quickly learn and adapt to entirely new technology stacks within a reasonable timeframe.

EXPERIENCE

- Rogersoft Technologies — Full-Stack Intern (Django, Python & React)** October 2024 – April 2025
 - Developed interactive, responsive frontend interfaces using React, Bootstrap 5, and Material-UI (MUI), enhancing user engagement, improving user experience, and ensuring UI consistency across the applications.
 - Contributed to the development and optimization of scalable backend systems with Python and Django, ensuring high performance and maintainability.
 - Integrated and managed SQLite and MySQL databases, focusing on schema design, query optimization, and performance tuning to efficiently handle large-scale data.
 - Collaborated effectively using GitHub for version control by resolving conflicts, maintaining code consistency, and supporting smooth integration within an Agile environment.
- Aurbiz & Beyond — Junior Project Associate** July 2023 – September 2024
 - Collaborated with the development team on Shopify-based e-commerce projects, assisting with store setup, theme customization, admin dashboard enhancements, and app integrations.
 - Supported end-to-end web development projects, including planning, content structuring, and front-end optimization using HTML, CSS, JavaScript, and Bootstrap.
 - Collaborated with cross-functional teams on project planning, development, and execution; coordinated with clients; and gained hands-on experience in delivering tech-driven business solutions in a startup-focused consulting environment.

SKILLS

- Languages & Tools:** Python, JavaScript (ES6+), HTML5, CSS3, Git, GitHub, npm, VS Code, REST API, Shopify CLI, Babel
- Libraries & Frameworks:** React, Axios, Redux, Material-UI (MUI), Liquid (Shopify), NumPy, Pandas, Django (Python), Bootstrap 5 (CSS framework), Django REST Framework (DRF)
- Databases:** MySQL, SQLite
- Platforms & Methodologies:** Shopify Admin, Agile
- Debugging:** Chrome DevTools, React Developer Tools
- Authentication & Security:** JSON Web Tokens (JWT), Session Authentication
- Cloud Services:** AWS (S3, EC2, Route 53, Amplify)

PROJECTS

- Online Book Store (Full-Stack App)** Ongoing
Django (Python), SQLite, HTML, CSS, JavaScript, Bootstrap
 - Built a full-stack online bookstore using Django, leveraging Django templates for the frontend and SQLite as the database.
 - Implemented key features including book browsing, search functionality, and filtering by category and author.
 - Developed cart and order management system enabling users to purchase books seamlessly.
 - Integrated secure user authentication and session management for both customers and admin users.
 - Designed and developed an admin dashboard to manage books, categories, orders, and user accounts with full CRUD functionality.
- Business Consulting Firm Profile Site** Ongoing
React, Material-UI (MUI), React Router DOM
 - Developed a responsive profile website for a business consulting firm using React and Material-UI.

- Designed and implemented the full UI, including landing page components and a video carousel in the hero section.
 - Created reusable components like a sticky navbar, responsive price cards for service packages, and a contact form.
 - Utilized React Router DOM for multi-page navigation with dynamic routes and clean linking.
- B2B Shopify Clothing Store** Ongoing
 Liquid (Shopify), Shopify CLI, Shopify Admin, Bootstrap
 - Customized a Shopify store for a clothing brand, focusing on B2B sales with retailer-based pricing logic, using Shopify CLI for efficient theme development and deployment.
 - Implemented set-based pricing (3 to 10 units) and enhanced the admin panel using Liquid and Shopify Admin for customer, order, and access control management.
 - Customized login and signup workflows, incorporating admin approval for price visibility and user verification.
 - Integrated Tally for accounting and WhatsApp API for direct customer communication and order tracking.
- Quote Generator App (Full-Stack CRUD Application)** March 2025
 React, Axios, Django (Python), SQLite, REST API, Bootstrap
 - Built a full-stack quote app using Django (REST API) and React to manage quotes submitted by users and admin.
 - Implemented full CRUD operations with class-based views and React state management.
 - Integrated REST APIs using Axios for data exchange between frontend and backend.
 - Designed a responsive UI with Bootstrap, including quote forms and dynamic quote cards.
- Contact Diary (Personal Contact Manager)** February 2025
 Django (Python), SQLite, HTML, CSS, Bootstrap
 - Built a Django-based contact manager with secure user registration, login, and personalized contact storage.
 - Implemented full CRUD operations for contacts, along with a search feature.
 - Enabled user-specific photo uploads with options to add and delete images.
 - Created an admin dashboard to manage all users and their data using session-based authentication.
- Project Management Dashboard** December 2024
 React, Redux, Axios, Material-UI (MUI), React Router DOM
 - Built a responsive project management dashboard using React and Material-UI.
 - Implemented user authentication and registration by integrating external APIs with Axios.
 - Used Redux for centralized state management of users, tasks, and application state.
 - Integrated JSONPlaceholder to fetch and display data.
 - Configured multi-page routing with React Router DOM to enable dynamic navigation between pages.
