SUMMARY

Full Stack Developer with 6 months of hands-on experience in designing and developing web applications. Proficient in JavaScript, React, Python, and full-stack development, with a strong foundation in back-end technologies. Confident in my ability to learn and adapt to entirely new technology stacks within a reasonable timeframe.

EXPERIENCE

- **Rogersoft Technologies — Python React Full-Stack Intern**   *October 2024 – April 2024*
  - Built interactive and dynamic frontend interfaces with React and Bootstrap 5.
  - Contributed to the design and optimization of scalable backend systems using Python and Django.
  - Integrated and managed MySQL databases, including schema design and performance-tuned queries.
  - Utilized Git for version control, ensuring efficient collaboration and conflict resolution.

- **Aurbiz & Beyond — Junior Project Associate**   *July 2023 – September 2024*
  - Collaborated with the development team on Shopify-based e-commerce projects, assisting in store setup, theme customization, and app integrations.
  - Supported the end-to-end execution of web development projects, including planning, content structuring, and front-end optimization.
  - Worked closely with cross-functional teams to assist in project planning, development, and execution across various initiatives.
  - Contributed to project documentation, client communication, and coordination of B2B events and e-commerce shoots, gaining hands-on experience with branding workflows and technology-driven business solutions in a startup-focused consulting environment.

SKILLS

- **Languages:** Python, JavaScript (ES6+), HTML5, CSS3
- **Frameworks:** React, Python-Django, Bootstrap 5, Liquid (Shopify)
- **Tools:** Git, GitHub, VS Code, Rest-Assured, Shopify Admin, Shopify CLI
- **Libraries:** Axios, Redux, Material UI (MUI), NumPy, Pandas, jQuery

PROJECTS

- Online Book Store (Fullstack App)   *Ongoing*
  React, Redux, MUI, Django, REST API, SQLite
  - Developed a fullstack ecommerce-style online bookstore using Django for backend and React (with MUI) for frontend.
  - Implemented book search, filter by category/author/subject, and cart-based purchasing via REST APIs.
  - Built secure customer login, registration, cart, and order checkout pages using React Router, Redux, and Axios.
  - Designed an admin dashboard for managing books, categories, orders, and user accounts with full CRUD capabilities.
  - Enabled order management flow: view, accept, or reject customer orders with real-time status updates.
  - Integrated secure authentication and session handling for both customers and admin users.

- Business Consulting Firm Profile Site   *Ongoing*
  React, MUI, React Router DOM
  - Built a responsive profile website for a business consulting firm using React and Material UI.
  - Designed and implemented the full UI layout, including hero section with image carousel, landing sections, and feature highlights.
  - Developed reusable components such as sticky navbar, responsive price cards for service packages, and a contact form.
  - Integrated a testimonial section to enhance credibility and user engagement.
  - Used React Router DOM to implement multi-page navigation with dynamic routes and clean linking.

- B2B Shopify Clothing Store   *Ongoing*
  Shopify, Liquid, Shopify Admin API, WhatsApp API, Tally Integration

  - Customized a Shopify store for a clothing brand, tailored exclusively for B2B sales with retailer-based product pricing logic.
  - Implemented set-based pricing in the admin dashboard — pricing varies by quantity per set (e.g., 3 to 10 units).
  - Displayed only price per unit on the product page; total price is shown only after adding items to cart.
  - Integrated **Tally** for accounting and **WhatsApp API** for direct customer communication and order tracking.
  - Customized customer login/signup workflows to include admin approval for price visibility; unverified users cannot view prices.
  - Enhanced Shopify admin panel using Liquid and Shopify Admin API to manage customers, orders, and access control.

- Quote Generator App (Fullstack CRUD App)   *March 2025*
  React, Axios, Django, Django REST Framework, Bootstrap

  - Developed a fullstack quote management application allowing users to submit, view, and list quotes using Django backend and React frontend.
  - Implemented full CRUD functionality using Django REST Framework and React state management.
  - Created REST APIs with class-based views and connected them to frontend using Axios.
  - Designed and styled interactive frontend forms and quote cards using Bootstrap and jQuery.
  - Built responsive quote rendering logic using component lifecycle methods and form handling in React.
  - Enabled secure quote submission from the client side and rendered dynamic Bootstrap card components based on user inputs.

- Contact Diary (Personal Contact Manager)   *February 2025*
  Django, SQLite, HTML/CSS, Bootstrap

  - Developed a Django-based personal contact manager allowing users to register, log in, and manage contact information securely.
  - Implemented full CRUD functionality for contacts, including add, edit, delete, and search operations.
  - Added user-specific photo galleries with the ability to upload and delete images.
  - Created an admin dashboard for the superuser to manage all registered users and their data.
  - Implemented session-based authentication for secure user login and personalized data handling.

- Project Management Dashboard   *December 2024*
  React.js, Redux, Axios, Material-UI, React Router

  - Developed a dynamic and responsive project management web application using React.
  - Implemented secure user authentication and registration by integrating external APIs with Axios.
  - Utilized Redux for centralized state management of tasks, users, and application state.
  - Integrated API data (users, posts, comments) from JSONPlaceholder to demonstrate client-server communication.
  - Built multi-page routing with React Router for seamless navigation between dashboard, tasks, comments, and user profiles.
  - Designed a modern, responsive UI using Material-UI components for a professional look and feel.

EDUCATION

- **Pondicherry University**   2021 — 2023
  Master of Arts in English   *Pondicherry, India*
- **Mahatma Gandhi University**   2018 — 2021
  Bachelor of Arts in English   *Kerala, India*
